Good and consistent cleaning performanceGentle on delicatesUses very little waterVery littl In fact, the Frigidaire was our one of our top performers on the delicate cycle, getting out tough stains while still being gentle on fragile fabrics. The washer also includes specialty cycles for stuffed toys and pet beds, to make cleaning up after kids and pets easier, and the steam cycle boosted its stain-busting performance, particularly for coffee, ink, lipstick, grass, and crayon stains. An NSF-certified sanitizing cycle removes 99.9% of bacteria and 99.5% of allergens. Old Bellow Ripped remove top of machine by removing 3 screws along the top edge in the back of your machine and then sliding the top back and up. Then loosen the screws holding on the control panel enough to get to the 2 screws at the top of the door panel. Next remove bottom panel by removing 2 screws along bottom edge then pulling it free from snaps. Then along the outside lip of the bellow, just inside the door, is a wire clip that is easily removed by prying it past rubber lip with a screw driver and lifting it away. Remove the door panel by removing bottom panel. After the door panel is removed and the bellow is completely exposed, you will find that it is held in place by a circular spring which wraps the whole way around the drum opening. Again it can be removed by prying it out away from the groove in which it sits with a screw driver. Now your machine is broken down as far as it needs to be. From here you can follow the directions included in your new bellow kit and put it back together by following these instructions in reverse.
